**Chairman of the Public Health Committee.

*Member of the Public Health Committee.

PUBLIC HEALTH OFFICERS OF THE COUNCIL

Medical Officer of Health:

P. M. SAMMON, M.B., Ch.B., D.P.H.

Deputy Medical Officer of Health:

A. L. J. CUSACK, M.B., Ch.B., B.A.O., D.P.H. (Resigned 31.8.69)

Public Health Inspector:

T. J. P. HENDRY, M.A.P.H.I.

Divisional Health Office, 6/8 St. Peters Street, Huddersfield.

To the Chairman and Members of the Meltham Urban District Council.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present to you the Annual Report on the health of the Meltham Urban District and the work of the Public Health Department during 1969. The Report is in the form prescribed by the Minister of Health.

The Sections of the Report which deal with the Sanitary Circumstances, Housing and Inspection and Supervision of Food have been compiled by your Public Health Inspector, Mr. T. J. P. Hendry, and form his Annual Report for the year.

According to the Registrar General there has been a further increase in the population of the district. At mid 1969, the population was estimated to be 6,370, which is 170 above that of the previous year and 957 above the 1961 Census figure. The live births attributed to the district number 99, compared with 103 the previous year. The number of deaths was 58, 24 fewer than in the previous year.

The incidence of infectious and other diseases does not call for any special comment.

At the end of the year despite strong pressure from the Council, Ministry approval had not been given for the purchase of an Incinerator.

In Section VII of the Report, particulars are given of the services provided by the West Riding County Council as the local Health and Education Authority.

In conclusion I have pleasure in recording the help and encouragement given to the staff of the Department during the year by members and officials of the Council. Appreciation must be expressed of the work of your Public Health Inspector, Mr. Hendry.

Yours faithfully,

P. M. SAMMON,

Medical Officer of Health.

SECTION I

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

The Urban District is situated on high ground about five miles to the south-west of Huddersfield, the principal centre of population being the township of Meltham, whilst other hamlets in the District are Meltham Mills, Helme and Wilshaw.

High moorland rising to a height of over 1,500 feet forms the western and southern parts of the District. The principal industries now carried on are engineering, including tractor building, woollen textiles, brick and tile making, the bottling, blending and wholesaling of wines, export packing, mixed farming, and a number of small firms with a variety of interests.

General Statistics

Area in acres	5,906
Enumerated Population (Census, 1931)	5,051
Enumerated Population (Census, 1951)	5,107
Enumerated Population (Census, 1961)	5,413
Registrar-General's Estimate of Population (middle of 1968)	6,200
Registrar-General's Estimate of Population (middle of 1969)	6,370
Area Comparability Factors: Births 1.13; Deaths 0.97	
Number of Inhabited Houses at end of 1969	2,432
Rateable Value (31st March, 1970)	£176,110
Sum represented by a Penny Rate (March, 1970)	£703 10 2

The chief causes of death were:

					1969	1968	1967	
(i)	Circulatory Diseases ex	cluding	Cere	bro-				
	vascular Disease	• •	• •	• •	27	40	20	
(ii)	Malignant Neoplasms	• •	• •	• •	13	9	15	
(iii)	Respiratory Diseases	• •			7	9	6	
(iv)	Cerebrovascular Disease	• •	• •		3	12	10	

In 1969 these four causes accounted for 86.21% of the total deaths, 43 or 74.14% occurred in persons 65 years or over and 26 or 44.83% in persons 75 years or over.

A table showing the causes of death, ages and sex distribution is set out on page 5.

Maternal Mortality

No deaths were registered as directly due to pregnancy or childbearing

Cancer

The number of deaths attributed to Cancer during the year numbered 13 (3 males and 10 females) as compared with 9 in 1968.

Causes of Death	Sex	All Ages	0-	4- wk's	1-	5-	15-	25-	35-	45-	55-	65-	75-

SECTION II

GENERAL PROVISION OF HEALTH SERVICES FOR THE AREA Staff

There is no change in the arrangements as detailed in previous reports.

Laboratory Facilities

These are available at the Wakefield Laboratory of the Public Health Laboratory Service.

Ambulance Service

For accident and general cases this is provided by the West Riding County Council. Infectious cases are removed by the ambulance of the Infectious Diseases Hospital to which the patient is removed.

Home Nursing and Midwifery

A full-time Home Nurse/Midwife employed by the County Council is resident in Meltham.

Treatment Centres and Clinics

These remain unchanged.

SECTION III

SANITARY CIRCUMSTANCES OF THE AREA

Mr. T. J. P. Hendry, Public Health Inspector, reports:—

Water Supply

The whole of the Urban District is supplied by Huddersfield Corporation Waterworks Department and I am indebted to W. M. Jollans, Esq., M.A., M.I.C.E., M.I.W.E., for the following information:

- (a) (i) The water is filtered and chlorinated prior to distribution and lime is added to the filtrate to raise the pH of the water to approximately 8.5.
 - (ii) The average consumption of water per head per day has been 41.7 gallons. The water has been satisfactory in quality.
- (b) Samples are taken from consumers' taps in the Meltham area and at the Filter Station and submitted to bacteriological examination.

3 %
Vil o
Vil
Jil
7%
1

Samples were taken quarterly and submitted to a full chemical analysis, the results of which are as follows:

			21st Mar.	4th July	17th Sept.	7th Dec.
рН			7.2	8.4	8.6	8.2
Total Solids	ø Þ		95	98	127	77

Potassium			0.8	0.8	0.8	1.1
Chloride			20	22	23	14
Fluoride			-		0.05	0.12

Water sampled on the 17th September was supplied from the Deer Hill Filter Plant as the Meltham Plant was shut down due to the failure of the supply during the drought conditions of the late summer.

- (c) Tests have shown that plumbosolvency is negligable at pH's above 7.0.
- (d) The single positive bacteriological result was due to a failure of the chlorinator pump which was repaired within 24 hours.
- (e) Number of dwelling houses and population in area supplied:

(i) Direct:	Houses	2,123
	Population	6,220
(ii) By Standpipe:	-	Nil

Sewerage and Sewage Disposal

During the year still further discussions took place with the Ministry regarding the proposed extension to the Sewage Works.

Closet Accommodation

Some little progress was made during the year in the abolition and conversion of privies and pail closets and a number of privies were converted to Water Closets mainly by means of Standard Grants with the addition of septic tanks and filters.

Public Cleansing

In January the contractor notified the Council that she was unable to fulfil her contract for refuse collection due to one vehicle being taken off the road and her inability to purchase another vehicle. The Council decided to take over the refuse collection, that is, with direct labour and to this end purchased the contractor's remaining vehicle and also an old refuse vehicle from Bradford Corporation. The staff employed by the contractors were taken over by the Council, but unfortunately difficulties arose regarding the amount of wages, but this was overcome by the provision of a bonus payment.

After some consideration two new Karrier Ramillies, 25 cubic yards

in capacity were ordered, and were delivered in July and August.

The whole of the Urban District was put on weekly collection and except for difficulties experienced during the bad weather this was maintained. The situation eased considerably when the new vehicles were received.

A number of small incinerators were inspected during the year and eventually the Council reduced this number to two, one being manufactured by the Incinerator Company and the other by Universal Machinery Limited. The Council finally decided to approach the Ministry with a view to purchasing an incinerator manufactured and installed by the Incinerator Company of London, but at the end of the year they were no further forward in receiving approval from the Ministry.

Filthy, Verminous or Unwholesome Premises

Three cases of verminous premises were found during the year and were treated by the department.

Shops Acts

No action has been taken under the Shops Act.

Clean Air

Atmospheric pollution measurements have been taken and the following table gives the lowest, highest and average values for smoke and sulphur dioxide readings.

		Average	e Value	Highes	t Value	Lowest	Value
1969		Smoke	SO_2	Smoke	SO ₂	Smoke	SO ₂

September				Insufficient	Readings	-	
October		93	76	208	156	25	23
November	••			Insufficient	Readings		
December	• •			Insufficient	Readings		

Thirty-seven observations were made of industrial chimneys and no nuisances were recorded.

Rodent Control

The sewerage system was treated in the month of September, the poison being fluoracetamide. No takes were recorded and no major problems were met in the treatment of properties in the district, although the rate of mice infestation has increased during the year.

Factories Act

Prescribed particulars on the administration of the Factories Act, 1961:—

Part I of the Act

1. Inspections for purposes of provisions as to health (including inspections made by Public Health Inspector):

13

14

(10) Details of Advances for the Purpose of Acquiring or Constructing Houses:

Nine advances were made during the year for the purpose of acquiring houses, the total sum involved being £7,610.

SECTION V

Mr. T. J. P. Hendry, Public Health Inspector, reports:—

INSPECTION AND SUPERVISION OF FOOD

Milk Supply

There were one hundred and sixty-three samples taken, and there were two positive cultures for brucellosis.

The Liquid Egg (Pasteurisation) Regulations, 1963

There are no egg pasteurisation plants in the district.

Meat Inspection

There is one licensed slaughterhouse only. The number of animals slaughtered was 481, an increase of 9 from the previous year. There was no evidence of Tuberculosis noted during the year.

The table set out below gives details of the meat inspection service—

	Cattle excluding Cows	Cows	Calves	Sheep and Lambs	Pigs
Number killed	15	78		182	206
Carcases Inspected	15	78		182	206
All diseases except Tuberculosis and Cysticerci Whole carcases condemned Carcases of which some part or organ was condemned Percentage of number inspected affected with disease other than Tuberculosis or Cysticerci		_	_		_ 1 0.48
Tuberculosis only Whole carcases condemned Carcases of which some part or organ was condemned Percentage of number inspected affected with Tuberculosis	— — —	— — —	_ _ _		
Cysticercosis only Carcases of which some part or organ was condemned Carcases submitted to treatment by refrigeration Generalised and totally condemned		_			_

Unsound Food

During the year 188 containers of food were surrendered and destroyed. Certificates were issued in each case.

Food Hygiene (General) Regulations, 1960 Food Premises

Food and Drugs Act, 1955

As the Food and Drugs Authority for the area, the West Riding County Council undertake the sampling duties aimed at preventing the adulteration of food.

This work is carried out by the staff of the Chief Inspector of Weights and Measures, who reports that during the year 16 samples of milk and 8 samples of other foods were taken, all of which were found to be genuine.

SECTION VI

PREVALENCE AND CONTROL OF DISEASES

Dysentery

During the year one case was notified, the patient being a female aged 24 years.

Scarlet Fever

During the year 15 cases were notified, 3 in June, 2 in September, 1 in October, 5 in November and 4 in December. All the cases were of school age.

Tuberculosis

Two new cases (pulmonary) were entered on the Register during the year and 3 cases (2 pulmonary, 1 non-pulmonary) were removed. The number of cases remaining on the register at the end of the year were:

Pulmonary	 	Male 5	Female 11
Non-Pulmonary	 	Male 1	Female Nil

WEST RIDING COUNTY COUNCIL—SERVICES

INTRODUCTION

In this section an account is given of the services provided by the West Riding County Council in the Division.

The Division which consists of the Urban Districts of Colne Valley, Denby Dale, Holmfirth, Kirkburton, Meltham and Saddleworth, has a population of 96,290 and an area of 82,750 acres. Although the population is only slightly more than one person per acre on average, owing to the wild moorland nature of much of the Division, the majority of the inhabitants live in small urban communities in the various valleys.

STAFF

The Divisional Medical Officer is also the Medical Officer of Health to the six County districts in the Division. There is an establishment for one Senior Departmental Medical Officer who is also Deputy Medical Officer of Health for all the County Districts except Saddleworth, and a Senior Departmental Medical Officer who is Deputy Medical Officer of Health for Saddleworth. Both these posts were vacant at the end of the year.

There is also provision for two full-time Departmental Medical Officers. One of the Departmental Medical Officers was promoted to the post of Senior Departmental Medical Officer (clinical) at the end of the year.

Twelve part-time Medical Officers undertake sessional work at Child Welfare Centres.

Four Mental Welfare Officers are employed wholly in the Division.

The staff at the Training Centre consists of a Supervisor, a Senior and two Assistant Supervisors, a Senior Instructor, an Instructor, an attendant and a Cadet.

Details of the Health Visiting, Home Nursing and Midwifery Staffs will be found later in this report.

The statistics given in this Section relate to the whole Division but where practicable they are sub-divided into those for the various districts.

VITAL STATISTICS

Births

The number of live births registered in the Divisional area during 1969 was 1,509 (778 male, 731 female) a decrease of 44 compared with the previous year.

THE CRUDE BIRTH RATE was 15.67 per 1,000 of the estimated population as compared with 16.30 for 1968.

The illegitimate live births numbered 90 or 5.96% of the total live births. This compares with 29 or 2.68% in 1955, 57 in 1962, 77 in 1963, 88 in 1964, 82 in 1965, 82 in 1966, 94 in 1967 and 102 in 1968.

Deaths

The deaths assigned to the Divisional area after correction for transfers were 1,323 (678 male, 645 female) an increase of 36 on the total for 1968.

THE CRUDE DEATH RATE from all causes was 13.74 per 1,000 of the estimated population as compared with 13.51 for the previous year.

The following were the principal causes of death in order of frequency:

(i)	Circulatory diseases (excl.	Cerebi	ovasc	ular di	sease)	 545
(ii)	Respiratory diseases	9 4	• •	• •		 221
(iii)	Malignant Neoplasms					 214
(iv)	Cerebrovascular disease				• •	 157

These four causes accounted for 85.94% of the total deaths.

Infant Mortality

In 1969 the deaths of infants under one year of age numbered 28, as compared with 26 in the previous year. Of these deaths 22 infants were under 4 weeks of age at the time of death.

THE INFANT MORTALITY RATE was 13.74 per 1,000 live births, as compared with 16.74 for 1968.

The death rate amongst legitimate infants per 1,000 legitimate live births was 19.03 as compared with 15.15 for 1968.

One illegitimate child died under one year of age giving a death rate amongst illegitimate infants per 1,000 illegitimate live births of 11.11.

EPIDEMIOLOGY

Smallpox

No cases of smallpox were reported during the year.

The number of records of vaccinations and re-vaccinations received during the year was 831 and 38 as compared with 635 and 21 respectively in the previous year.

Details of the various age groups vaccinated and re-vaccinated are given below:—

VACCINATIONS							RE-V	ACCIN	IATIO	NS
Under 1	1	2–4	5–15	16+	Total	1	2-4	5-15	16+	Total
6	582	174	69	_	831		9	29		38

No cases of Generalised Vaccinia were reported.

Diphtheria

No cases of Diphtheria were notified during the year.

Arrangements for immunisation have continued as in previous years, the inoculations being given at Infant Welfare Centres and by private medical practitioners.

During the year, 907 children received a full course of primary immunisation and 913 received booster doses as compared with 965 and 855 respectively in 1968.

Of the 1,553 children born in 1968, 1,066 were immunised against diphtheria either in 1968 or 1969. This is equivalent to a percentage of 68.64%, as compared with 79.84% for 1967.

Number of Children Immunised in 1969 Against Diphtheria

		Children born in years							
	1969	1968	1967	1966	1962–65	Others under age 16	Total		
Completed Primary Courses	51	792	34	7	21	2	907		
Re-inforcing Doses		11	36	7	823	36	913		

Records of the immunisation state of children in the Divisional area as at 31st December, 1969, are shown below:—

Age at 31.12.69 i.e., Born in Year	Under 1 1969	1–4 1965–68	5–9 1960–64	10–14 1955-59	Total Under 15
Last complete course of injections (whether primary or booster) A. 1965-69	51	3,043	3,691	3,659	10,444
B. 1964 or earlier	_	163	2,302	1,831	4,296
	Children	under 5	Children 5–14		
Estimated mid-year child population	7,4	400	12,000		19,400
Percentage of child population last immunised 1965-69 (whether primary or booster)	41 . 81		61 25		53 84

Measles Vaccination

The number of persons who received vaccination against measles during the year was as follows:

Born in year			
1969			
1968	• •		64
1967			215
1966			118
1962-65			147
1953-61			6
	Total		550
		• •	

This compares unfavourably with the previous year when 1,464 persons were vaccinated, the reason being that for much of the year vaccine was in very short supply.

Whooping Cough

Immunisation of children against whooping cough has continued throughout the year. The majority of children immunised received protection through the combined antigens.

The inoculations have been carried out by private medical practitioners and at Infant Welfare Centres and during the year 890 children received protective treatment as follows, compared with 940 in 1968:—

THE REAL PROPERTY.	Nu	mber o	f childre	en immu	nised born	in year	
	1969	1968	1967	1966	1962–65	1953-61	Total
	51	785	33	4	15	2	890

Of the 1,553 children born in 1968 a total of 1,058 were immunised either in 1968 or 1969. This is equivalent to 68.1% of the total number of children born in 1968 and compares with 79.4% for 1967.

Dysentery

During the year 8 cases of Sonne Dysentery were confirmed in the Division as compared with 30 cases in 1968. Six of these cases occurred in Colne Valley U.D., one in Meltham U.D. and one in the Saddleworth Urban District. Of these 3 were children of pre-school age, 4 were children of school age and one was an adult.

Acute Poliomyelitis

No cases of acute poliomyelitis occurred during the year.

The arrangements for vaccination against poliomyelitis have continued.

During the year, vaccinations given were as follows:—

						Orai
Children born in 1969	• •		• •			51
Children born in 1968	o c	• •				859
Children born in 1967	• •				• •	62
Children born in 1966						8
Children born in 1962—1965		• •		• •	• •	29
Others under age 16 years						4
Received 4th booster doses (ch	nildren 5	-11 year	rs)			926

Food Poisoning

Two cases of food poisoning occurred, one in Colne Valley U.D. and one in the Saddleworth U.D.

Brucellosis in Cattle

During the year the Public Health Inspectors in the various Urban Districts in the Division and the County Milk Sampling Officers have continued taking samples of milk for biological test for Tuberculosis and Brucellosis. No samples were positive for Tuberculosis but of 371 herd samples taken 21 were positive for Brucellosis by cream culture test.

The follow-up of the positive herd samples resulted in the taking of 1648 individual cow samples of which 63 were positive by cream culture test. In consequence of these results, 36 compulsory Pasteurisation Orders were made under Section 20 of the Milk and Dairies Regulations (General) 1959, involving 29 farms.

Details of the samples taken in the various Urban Districts are given

in the following table:—

		HERDS				INDIVIDUAL COWS			
District	No.	Pos	itive Res	ults	No.	Results Positive			
	Taken	Cream	Serum	Spleen	Taken	Cream	Serum	Spleen	
Colne Valley Denby Dale	61 35	2 2			4 872	1 32

MIDWIFERY AND MATERNITY SERVICES

Domiciliary Midwifery

The number of cases attended by the domiciliary midwives during the year was 201 as compared with 191 in 1968.

At the commencement of the year, 4 midwives and 9 nurse/midwives were engaged in the Division. During the year, one part-time nurse/midwife was appointed and one nurse/midwife resigned.

At the end of the year the staff consisted of 4 midwives and 9 nurse/midwives (one of them part-time).

The services of the domiciliary midwives continued to be offered to all patients confined in hospitals or maternity homes but discharged home before the 10th day of puerperium. During the year, 522 such patients received nursing care, 2,019 individual visits being paid to them.

Of the 1,535 births notified and attributed to the Division, 202 occurred at home. The midwives and Home Nurse/Midwives together attended 202 cases.

Notifications:

Four notifications relating to stillbirths were received from midwives practising in the Division.

Medical Assistance:

Medical aid forms sent in by midwives during 1969 numbered 68, (11 domiciliary, 57 institutional).

The institutional notifications all related to mothers confined in the Holme Valley Memorial Hospital.

Gas and Air Analgesia

Each of the 13 domiciliary midwives was supplied with a trilene apparatus and 3 were held in reserve.

Trilene was administered to 146 cases or 72.28% of the cases attended as compared with 125 cases in 1968.

Pethidine was administered by domiciliary midwives to 114 cases or 56.44% of the cases attended as compared with 134 cases in 1968.

Ante-Natal Clinics

During the year, 97 ante-natal patients attended at the various clinics, details of which are given in the following table:—

	Number	Number of Patients		Numb Attend		Average	
Clinic	Number of Sessions	Ante- Natal	Post- Natal	Ante- Natal	Post- Natal	attendance per session	
Springhead Uppermill	27 23	73 24		292 133	_	10 81 5.78	
TOTAL	†50	97		425		8.50	

†Includes 37 sessions conducted by midwife—no doctor present.

The arrangements made with the general practitioner/obstetricians for the midwives and home nurse/midwives to attend the weekly antenatal clinics conducted by them in their surgeries have continued. Particuars of attendances at these clinics are given below:—

		No. of sessions	No. of attendances
Denby Dale	 >	48	429
Golcar	 	40	144
Golcar	 • •	46	201
Honley	 	35	669
Shepley	 • •	23	250
Meltham	 	39	317
Skelmanthorpe	 	45	551
Slaithwaite	 	52	272
Slaithwaite	 	47	225
Slaithwaite	 	45	152
Scissett	 	11	68
Kirkburton	 	22	177

The attendances at the ante-natal relaxation classes show an increase of 449 on those for 1968. The instruction given by the midwives and health visitors is greatly appreciated by the expectant mothers.

Particulars of attendances at these classes are shown in the following table:—

Clinic	Number of Sessions	Number of Patients	Number of attendances	Average attendance per session
Golcar Honley Kirkheaton Kirkburton Lepton Meltham Scissett Slaithwaite Uppermill Springhead Holmfirth Marsden	46 47 48 51 43 48 38 46 47 47 47 36 14	36 39 35 41 24 39 46 34 46 31 48 7	211 259 240 245 221 285 264 135 378 227 304 44	4.59 5.51 5.00 4.80 5.14 5.94 6.94 2.93 8.04 4.83 8.44 3.14
TOTAL	511	426	2813	5.50

Flying Squad Arrangements

The arrangements for the "Obstetric Flying Squads" based on the Huddersfield Royal Infirmary and the Oldham and District General Hospital have continued. No calls were made on either squad to attend patients in the Division during the year.

Institutional Midwifery

The percentage of institutional births is 86.84 as compared with 87.52 in 1968 and 85.12 in 1967.

The system of booking for maternity accommodation in Huddersfield whereby applications are made through the general practitioner has continued and has secured a better selection of patients. No requests from hospitals for environmental reports have been received during the past four years.

The scheme for planned 48 hour-plus discharge from the Marron Maternity Unit at the Oldham & District General Hospital continues to work satisfactorily. Notification is received of all pending early discharges and environmental reports are submitted in those cases where the home conditions are considered to be unsuitable.

Premature Babies

During the year 91 babies weighing $5\frac{1}{2}$ lbs. or less were born alive in hospitals or nursing homes to mothers normally resident in the Division and 4 were born at home. Of those born at home one was a stillbirth and the other 3 were surviving at the end of the month.

Co-operation with General Practitioners

For a number of years it has been the policy of the West Riding to encourage co-operation with General Practitioners. Evidence of this policy is seen in the Division by the increasing use by General Practitioners of Local Authority Health Premises, either as main or branch surgery accommodation. Nursing attachments to practices are popular. There is an increasing use by General Practitioners of the County Computer facilities for vaccination and immunisation programmes.

A highlight of the year was when the General Practitioners moved into the new Health Centre at Holmfirth.

At the present time, sixteen General Practitioners representing six practices use Health Premises for main branch surgeries. A further five General Practitioners use Local Authority Clinics for branch surgeries.

CHILD WELFARE

Distribution of Welfare Foods

There has been no change in the arrangements for the distribution of Welfare Foods.

At the 17 distribution centres in the Division the welfare foods distributed during the year, and the comparative figures for 1965, 1966, 1967, and 1968 are as follows:

	1969	1968	1967	1966	1965
National Dried Milk (Tins)	1,183	1,889	2,183	2,492	2,911

Cod Liver Oil (Bottles)	1,849	2,226	2,134	2,351	2,458
Vitamin A. & D. Tablets (Packets)	1,704	1,501	1,546	1,680	1,833

Infant Welfare Clinics

As compared with 1968 there has been an increase of 130 to 4,622 in the number of children who attended the various clinics and an increase of 972 to 33,316 in the number of attendances made. The attendances at the Mobile Clinic have also increased during the year when 226 children made 920 attendances as compared with 183 children making 825 attendances in 1968.

Nurseries and Child Minders Regulation Act, 1948 As Amended by the Health Service and Public Health Act, 1968

The new acts became operative during the year and should make for the achievement of better standards all round. Due to the shortage of staff and the amount of work involved, it will take the department some time to secure the formal registration of all applicants under the above acts.

At the end of the year there were 7 registered Child Minders in the area. The number of children permitted to be received varies from 2 to 12. In addition 5 playgroups for toddlers were registered under the Act, the size of these groups varying from 16 to 24 children.

There are no day nurseries in the area provided by the County Council but occasionally children are admitted to Day Nurseries in the Huddersfield County Borough at the expense of the County Council.

HEALTH VISITING

The number of cases visited during the year was 9.586 which is an increase of 1,045 on the previous year.

During the year one full-time and one part-time qualified health visitors resigned their appointments, whilst 2 full-time qualified health visitors were appointed.

A Health Visitor has continued to attend the diabetic out-patient clinic held at the Huddersfield Royal Infirmary on one half-day each week. She also carries out home visitations of the West Riding patients attending the clinic. During the year, the Health Visitor attended 51 clinic sessions and made 2,197 home visits to 334 patients.

Visits paid by Health Visitors

Cases Visited	No. of Cases
Children born in 1969	1,547 1,577
Children born in 1964–67	2,451 5,575
Persons aged 65 or over (excluding "domestic help only" visits)	1,006
Mentally disordered persons Persons, excluding maternity cases, discharged from hospital	34 480
No. of tuberculous households visited No. of households visited on account of	154
other infectious diseases Other cases	28 2,308

HEALTH EDUCATION

In 1969 the Health Visitors and the Divisional Nursing Officer have continued their Health Education work from 1968. This includes:

Topical displays in the clinics.

Illustrated talks to the Expectant Mothers at the Ante-natal Relaxation Classes.

Illustrated talks to various organised meetings as invited speaker.

Participation in the sponsored Mothers Clubs held in the clinics.

Mothercraft talks to girls in Secondary Modern schools who are sitting their C.S.E. examinations.

School Health Education programme as requested by Head Masters to various groups of children.

Participation in P.T.A. meetings either as invited speaker, member of a panel or in the audience in advisory capacity.

Many of the Home Nurses and Midwives are also involved in Health Education participating in:

The Ante-natal Relaxation classes.

Talks to various organisations as invited speakers.

Mothercraft demonstrations to girls in Secondary Modern schools who are sitting their C.S.E. examinations.

The sponsored West Riding County Council Mothers Clubs.

Home Nurses and Midwives along with the Divisional Nursing Officer, General Practitioners and the ambulance Officer all share the responsibility of training the local Home Helps when courses can be arranged. Two were successfully held in 1969.

In this Division there is a very close liaison with the Ambulance officers at the Depot in Honley. The station officer is frequently part of the Health Education team with the staff in the School Health Education programme, the Home Help courses, at various organised meetings of the public, and at staff conferences.

Unfortunately the Home Nurses and Midwives have no official training in the use of the projector. It is felt that the staff require periodical stimulus and more training in this field.

PROBLEM FAMILIES

The two Co-ordinating Committees operating in the Division have continued to meet regularly throughout the year. Representatives from the County Health, Education, Welfare and Children's Departments attended each meeting, together with representatives from the various County Districts. Other members of the Committees are the local N.S.P.C.C. Inspectors, officials of the Department of Health and Social Security and the Probation Officers.

The Saddleworth Committee met four times during the year, with an average attendance of 9 members. A total of 16 families were discussed, 7 of them being new cases. Six families were removed from the list during the year, 3 of them being improved, one left the district, one died and in one case the child was removed to residential care.

The Huddersfield Committee met 6 times during the year with an average attendance of 14 members. A total of 35 families were discussed, 10 of them being new cases. 7 families were removed from the list, 5 being improved, and 2 having left the district.

The Committees have continued close liaison with the Housing Authorities.

During the year rent guarantees were in operation in respect of 16 families, in 5 cases these being withdrawn.

No cases were assisted during the year by the provision of a domestic help without assessment.

HOME NURSING

At the commencement of the year 9 full-time and 2 part-time home nurses and 9 nurse/midwives were engaged in the Division. During the year one full-time and one part-time home nurses and one full-time nurse/midwife resigned their appointments. One part-time home nurse and one part-time nurse/midwife were appointed.

At the end of the year, the staff consisted of 8 full-time and 2 part-time home nurses and 8 full-time and one part-time nurse/midwives.

A summary of the number of cases dealt with during the year is shown in the following table:

Classification		No. of cases attended by Home Nurses during year	No. of visits paid by Home Nurses during year
Medical		1,462	31,619
Surgical		633	12,733
Infectious Diseases		15	252
Tuberculosis		18	481
Maternal complications	• •	40	285
Other			_
Total	• •	2,168	45,370
Patients included above who were aged 65 or over at the time of the first visit during the year		1,286	28,573
Children included above who were under 5 years of age at the time of the first visit during the year		75	572
Patients included above who have had more than 24 visits during the year		526	32,362

CONVALESCENT HOME TREATMENT

The County Council provide convalescent home treatment for approved patients. During the year, 5 cases were sent to Convalescent Homes on the family doctor's recommendations. Five additional applications were withdrawn.

THE HOME HELP SERVICE

The number of part-time Home Helps employed during the year was 167 and these gave help equivalent to that of 56.26 full-time Home Helps, an increase of 2.43 on those employed in 1968.

The number of patients receiving help during the year was 902, an increase of 23 compared with 1968, and the total hours of service given increased by 5,038 to 117,013.

All our home helps are employed on a part-time basis, this being found to be more satisfactory than the employment of whole-time helps, as it enables the home help to be given two or three cases to attend in the vicinity of her home and obviates the necessity of travelling far and wide throughout the Divisional area. It is still difficult to recruit home helps who are willing to work during weekends.

Two training courses for home helps were held again this year. Each course consisted of three meetings, the subjects under discussion being as follows:

- (a) Co-ordination of the work of the home help and the nursing personnel.
- (b) Dealing with emergency medical problems, the speaker being a general medical practitioner followed by the Ambulance Station Officer demonstrating mouth to mouth resuscitation.
- (c) Budget cooking, demonstrated by a representative of the Gas Board.

These courses were held in Scissett for home helps in the Kirkburton and Denby Dale areas and in Holmfirth for home helps in that area. The response was good and it is possible that further recruitment would be encouraged by the introduction of recognised courses and the issue of profleiency certificates.

Details of the assistance given to the 902 patients are shown in the following table:

CHIROPODY SERVICE

During the year there was an increase of 43 in the number of patients receiving treatment and an increase of 170 in the number of treatments given.

The proportion of handicapped persons and expectant mothers is very low but in fact, many handicapped persons are included in the Pensioner class.

The extent to which treatment is being provided at more frequent intervals than every two months is very small (1.8% of patients receiving treatment).

During the year 1,877 patients made 9.508 attendances at treatmen⁴ centres and 870 patients received 4,068 domiciliary visits.

National Assistance Acts, 1948-1951

Under Section 47 of the National Assistance Act, 1948, a local authority may take action to secure removal to suitable premises of persons in need of care and attention. No action was taken under this Section during the year.

Ambulance Service

During the year close co-operation has been maintained with the Superintendent of the Huddersfield Depot and any difficulties of a medical nature arising have been discussed.

The Service has worked smoothly throughout the year and complaints have been negligible.

During the year the ambulances from the Huddersfield Depot travelled 202,087 miles and carried 33,695 patients, 2,943 of these being stretcher patients. Particulars of the cases carried are given below:—

Out-Patients	 	 	29,551
Admissions	 	 	2,152
Discharges	 	 1 2	932
Transfers	 	 	304
Accident Patients		 	756
			33,695

In the Saddleworth area arrangements with the Oldham County Borough Ambulance Service have continued.

During the year ambulances of the Oldham Service made journeys involving 20,702 miles and carried 2,904 patients and in addition journeys involving 36,042 miles were made by Sitting Case Cars on behalf of 4,768 patients. Of the patients carried 253 were classed as accident cases, 207 emergency cases and 7,212 others.

Medical Examinations for Superannuation Purposes

During the year 34 examinations regarding suitability for entry into the County Council Superannuation Scheme were carried out by the Department's Medical Staff.

In addition, 7 examinations were carried out on behalf of other Authorities.

Six special examinations following prolonged sickness were also made at the request of the various employing Authorities.

MENTAL HEALTH SERVICE

The year was marked by further steady progress in the development of the service and an ever increasing closer liaison of the mental welfare officers with the general practitioners and hospital authorities.

Hospital Liaison

Patients continue to attend as day patients at both St. Luke's Hospital, Huddersfield and the Elizabeth Martland Unit, Oldham and District General Hospital. This is a very useful service which enables patients to live at home who would otherwise have to be admitted to hospital.

The Mental Welfare Officers attend the Psychiatric Out-Patients Clinic at St. Luke's Hospital, Huddersfield, on one morning and two afternoons each week and a Mental Welfare Officer visits the Psychiatric Out-Patients Clinic at Oldham and District General Hospital most weeks. This has resulted in a better liaison between the Consultant Psychiatrists and the opportunity to visit patients whilst still in hospital prepares the way for after-care.

Difficulties do arise in placing patients in employment. There are too few sympathetic employers and some patients not really wanting to work often need a great deal of encouragement.

Psychiatric Clubs

On the 1st January the Huddersfield County Borough and West Riding Joint Club was re-started and was most successful. There was an average attendance of 18 members. The members of the Club were taken on a visit to the Saddleworth Club, and members of both Clubs visited the Club at Cleckheaton and also went on a mystery drive into the Bronte Country.

The Saddleworth Club is still mainly occupational but some very lively discussions take place. There was an average attendance of 15 members. Thirty members and relatives enjoyed a day trip to Southport, and together with members from the Huddersfield Club were taken to see the Black and White Minstrels Show at Bradford. Both Clubs had an enjoyable Christmas Party.

Training Centre, Kirkburton

The trainees admitted from the Brighouse Division pending the building of a training centre in that Division have continued to attend.

The number of trainees in attendance at the end of the year was 97, 42 of them being under 16 years of age. The areas from which the trainees who were in attendance at the end of the year came are as follows:—

	,	Under 1	6 years	Over 1	6 years	То	tal
Resident In		Male	Female	Male	Female	Male	Female
Colne Valley U.D. Denby Dale U.D. Holmfirth U.D. Kirkburton U.D. Meltham U.D. Saddleworth U.D. Division No. 19 Division 18		6 6 7 3 1	2 2 10 2 2 1	5 5 8 4 1 — 1 9	3 8 4 2 2 — 3	11 11 8 11 4 1 1	5 10 14 4 4 1 -3
Total		23	19	33	22	56	41

The trainees' progress in the Junior Wing has been very satisfactory.

The Special Care Unit continues but attendances have been disappointing particularly during the winter months.

The total value of work done in the Adult Wings on behalf of the County Supplies Department amounted to £1,077 19s. 4d. In addition to this various contracts were arranged direct with local firms.

In addition to the purely industrial work, domestic tasks such as tea-making, the laying of dinner tables and washing-up are shared by both sexes. Unfortunately, social training and basic training in educational subjects have not been possible during the year because of the shortage of staff.

The Mental Welfare Officers take a keen interest in the Centre and are a great help in developing a liaison between the Centre and the trainees' homes.

The adult trainees have made various visits and excursions during the year. In June 6 male trainees and the Senior Instructor had a camping weekend in the Centre grounds. On the 1st July, 50 trainees were taken on a day's outing to Bridlington and in September, 34 trainees and parents were taken on a week-end trip to London.

As in previous years an opportunity was given for trainees to join holiday parties. The holiday for the juniors was at St. Annes-on-Sea and for the adults at Skegness. Five juniors and 5 adults from the Kirkburton Training Centre went on the holiday. A member of the staff at the Centre attended with each group.

The Parent/Teacher Association continues to be very active. Various money raising efforts were made during the year, most of the money being ear-marked for the projected swimming pool at the Training Centre.

Saddleworth Area

A good liaison continues with the Oldham County Borough Authorities. At the end of the year 2 trainees from the Saddleworth area were in attendance at the Junior Training Centre and 5 trainees were attending the Industrial Centre. One trainee from the Saddleworth area was also in attendance at the Day Centre run by the Oldham Spastics Society.

Summary of Sub-Normal Patients in receipt of care and guidance at the end of the year

SCHOOL HEALTH SERVICE

Introduction

This account of the School Health Service is a Divisional report and is a combination of the reports presented to the Upper Agbrigg Divisional Executive and the Saddleworth District Sub-Committee. The statistics relate to the whole Division.

Schools in the Area

There are in the Division 75 schools or separate departments, which include the Royd Edge Special School, Meltham.

The approximate number of pupils on the registers in December, 1969 was 13,946 (an increase of 895 as compared with the previous year) and was composed of:—

Infants	<i>Juniors</i>	Seniors
3,753	5,340	4,853

Of the 68 Primary Schools, 32 are Voluntary and 36 are County Schools:—

The distribution is as follows:—

		olne alley		enby ale		olm- rth		irk- rton		el- am		ddle- orth	7	Total
Type of School	Schools	Pupils	Schools	Pupils	Schools	Pupils	Schools	Pupils	Schools	Pupils	Schools	Pupils	Schools	Pupils
Primary	17	2094	9	1150	14	1848	14	1626	3	708	11	1667	68	9093
Secondary Modern Grammar Comprehensive Special	_ _ _ _	1538	1	601	1 1 -	942 831 —	1	330		<u>-</u> 54	1	557	4 1 1 1	2430 831 1538 54
All Types	18	3632	10	1751	16	3621	15	1956	4	762	12	2224	75	13946

Pupils from Saddleworth attend Grammar Schools in Oldham and Manchester, but so far as the School Health Service is concerned, they are the responsibility of the Medical Officers of the Independent Schools and of the Oldham County Borough Council.

Some pupils from outlying parts of the Division attend Grammar Schools at Mirfield, Penistone, etc.

Medical Inspections

The Medical Inspection pattern was continued as in previous years. As a rule the initial examination is a Pre-school Medical Examination. Thereafter selective examinations are undertaken at the intermediate and leaver stages.

The method of selection is by the process of sending questionnaire to parents and obtaining reports from teachers and health visitors. The questionnaires and reports are then perused by the School Medical Officer who only sees those children who may have medical problems.

During the year 1,637 periodic examinations were carried out whilst the number of 'specials' was 1,916. (This figure includes those examined under the Selective Method).

Particulars of the age grouping of children found at periodic medical inspections to require treatment are given below:—

Age groups inspected (by year of birth)	For Defective Vision (excluding squint)	For any of the other conditions recorded in table of defects	Total individual pupils
1965 and later 1964 1963 1962 1961 1960 1959 1958 1957 1956 1955 1954 and earlier	6 5 2 1 5 2 — — — 1 1	69 22 8 2 4 1 —	58 20 7 3 7 3 — 2 1
Total	23	108	102

Defects Found at Medical Inspections

The following table gives details of all defects noted at both periodic, selective and special examinations. All defects noted at medical inspections as requiring treatment are included, whether or not this treatment was begun before the date of inspection:—

		Number o	f Defects

Other	25	87	14	163
TOTAL	131	747	218	1209

Physical Condition of Children

All pupils, except five, at routine periodic medical inspections were classified as being 'Satisfactory'.

Other Examinations

In addition to routine, special and follow-up examinations of children at school medical inspections, children were examined at home or at school for various reasons. These include non-attendance at school, children returning to special schools, and also those examined with a view to providing special educational treatment.

Uncleanliness

The total number of inspections made during the year was 17,210 and 190 instances of infestation were found as compared with 16,980 and 220 respectively in 1968. There were 129 individual children (0.92% of the school population) found to be infested on at least one occasion, a decrease of 72 compared with the previous year.

Arrangements for Treatment

School Clinics

There are no special school clinics in the Division. The children of school age may attend any of the 17 child welfare centres in the area for treatment of minor ailments and to receive "booster doses" of Diphtheria, Tetanus and Poliomyelitis antigens. During the year, a total of 761 attendances were made by school children at such clinics. Included in this figure are those children who attended for a medical examination just prior to starting school at the age of 5 years.

Special Clinics

Ophthalmic Clinics

The Leeds Regional Hospital Board continued to make available the services of Dr. M. Davies for two sessions per week in the Divisional Area. This continued until August, 1969, when Dr. Davies resigned and unfortunately it has not been possible to engage a successor.

The sessions were arranged as required at Kirkburton, Meltham, Slaithwaite and Uppermill Clinics, where special facilities are available.

During the year, 50 special clinic sessions were arranged and these were attended by 606 children who made 650 attendances. Spectacles were prescribed for 94 children.

Orthopaedic Clinics

The special hospital Out-Patient clinic for West Riding children has continued to be held by Mr. J. H. Annan and Mr. G. F. Hird at the Huddersfield Royal Infirmary. At the 13 sessions held during the year, 83 children made a total of 111 attendances.

Child Guidance Treatment

The waiting list of children to be seen at the Child Guidance Clinic is lengthy and thus cases have to be carefully selected before they are actually referred to the Clinic. In the Division we are indebted to the help given to us by Dr. K. N. Maxwell, psychiatrist, and Mr. D. G. Pickles and Mr. P. J. Monaghan the Educational Psychologists. During the year 27 children from the Division attended the clinic.

Speech Therapy

There is an establishment for one full-time Speech Therapist. In the present shortage of Speech Therapists we are still fortunate to have the services of Mrs. Stacey for 4 sessions a week. Inevitably there is a waiting list of children to be seen by the Speech Therapist and cases for referral have to be selected. During the year, 204 individual children attended for treatment at clinics held at Slaithwaite, Meltham, Honley and the Divisional Health Office, Huddersfield.

Dental Treatment

A comprehensive dental service is available throughout the Division. Details of the work carried out during the year and the previous year are summarised below:—

		1969	196 8
No. of children inspected		10,782	10,344
No. of children found to require treatment		4,881	4,436
No. of children treated		3,645	3,203
No. of attendances		6,328	7,575
No. of extractions—temporary		2,798	2,682
No. of extractions—permanent		889	906
No. of fillings—temporary	• •	954	504
No. of fillings—permanent		5,401	4,713

Diphtheria Immunisation

The previous arrangements for diphtheria immunisation have continued, the injections being given by private practitioners and at the Welfare Centres.

The majority of children are now immunised before entering school. This should always be the case and the importance of immunisation in infancy cannot be over emphasised. Children protected in infancy should have booster injections when they commence school and five years later.

The number of children who received primary immunisation after entering school was 23 and the number receiving re-inforcement injections was 859.

B.C.G. Vaccination

In accordance with the County Council's scheme for the prevention of Tuberculosis, arrangements were made to offer B.C.G. Vaccination to all children aged 11 years and over. Vaccinations were carried out during October when 847 children were vaccinated.

Details are given below of the work undertaken during the year:							
Number of children offered	B.C.C	J.					1179
Number of acceptances			• •				934
Number completing skin	testing	(inclu	iding	children	broug	ght	
forward from previous y	ear)	• •				• •	934
				• •			67
% positive	• •		• •	• •		* *	$7 \cdot 4$
Number negative		• •		• •	• •		847
Number Vaccinated	a *						847
Number of Skin Tests after	r 12 mc	onths			٤	• •	

Protection of Children Against Tuberculosis

The arrangements for the X-ray examination of the chests of all new entrants to the teaching profession and non-teaching staff of schools have continued. Likewise have those for re-examination when the Mass Radiography Unit is available in the area.

The children found to be mantoux positive as a result of tests for B.C.G. vaccinations are invited to attend for X-ray examination when the

Mass Radiography Unit is operating in the area.

School Meals Service

New entrants to the staffs of school canteens are examined by the Department's Medical staff. During the year 96 new entrants were examined and in each case a certificate to the effect that the examinee was fit to work in the School Meals Service was forwarded to the Divisional Education Officer.

Youth Employment Service

There is close co-operation between the School Health and Youth Employment Services. The medical records of all school leavers are considered by the School Medical Officer before the pupils are interviewed by the Youth Employment Officer and types of work for which any child is, in the opinion of the Medical Officer, unsuited, are pointed out.

The more seriously handicapped children are recommended to the Youth Employment Officer for inclusion in the Disabled Persons Register.

In connection with the Employment of Children Bye-Laws, certificates regarding their suitability for employment outside school hours were granted to 37 children for employment as follows:

	CO COCK	0 110 1	
Newspaper delivery			26
Shop work	• r		5
Light duties (Eng.)			2
Clerk			1
Delivery of Milk			1
Entertainment			1
Errand Boy			1

Handicapped Pupils

Facilities for the special educational treatment of all classes of handicapped pupils requiring residential care are now fairly readily available, except those classified as Educationally Sub-normal and Maladjusted.

During the year 28 pupils already on the Handicapped Pupils Register were examined to ascertain their need for continued special educational treatment. In addition 15 children were examined for the first time and 15 were put on the Register of Handicapped Pupils. Three pupils already receiving special educational treatment moved into the area and their names were entered on the Register. The number of children removed from the Register as no longer requiring special educational treatment, or because they were over school age or left the Division was 11.

At the end of the year, 210 children were included in the Register, the sub-division into the various classes being as follows:—

	No. on Register	No. at Special School	No. at Ordinary School	No. of Col. 3 awaiting placement
Maladjusted Deaf Partially Deaf Delicate Partially Sighted Blind Physically Handicapped Educationally Subnormal	10 7 5 13 5 2 27 131	5 7 5 3 1 2 13 56	4 - 8 4 - 13 74	3 - 1 2 - 1 14
	200	92	103	21

- 1. One physically handicapped child and 2 delicate children are receiving home tuition.
- 2. One maladjusted child shown above is away at a remand home at the moment.
- 3. One educationally subnormal child committed to an Approved School.

The Children's Home, The Leas, Scholes

This report on 'The Leas' Children's Home is for the year ended 31st March, 1970.

During this period all the cottages have been in use.

The number of admissions during the year was 100 and there were 99 discharges. The number resident on 1st April, 1969 was 66 and on the 31st March, 1970, was 67.

All children are medically examined as soon as possible after admission and there was one full routine medical inspection. During the year, 31 children made 70 attendances at the Dental Clinic, 6 children made 12 attendances at the Eye Clinic, 3 children attended the Child Guidance Clinic and 2 children received treatment at the Orthopaedic Clinic.

Nortonthorpe Hostel for Maladjusted Boys

The purpose of the Hostel is to provide a stable and pleasant background for socially insecure children and so enable them to mature and eventually return to their homes without breaking down.

At the end of the year, 24 boys were in residence at the Hostel.

Reports to the Local Health Authority: Education Act, 1944. Section 57

During the year, 13 children were reported to the Local Health Authority under Section 57(4), 8 as "Unsuitable" for education at school and 5 as requiring "Care and Guidance after leaving school".

Medical Examination of Teachers and Entrants to Courses of Training

During the year, 138 candidates (55 male and 83 female) for entry into Teachers' Training Colleges were examined and reports submitted to the appropriate College Authority. In addition, 11 reports on Form 28 R.Q. regarding the new entrants to the profession were forwarded to the Ministry of Education.

Liaison with Hospitals and General Practitioners

Cordial relations exist between staffs of the School Health Service, the Hospital Service and the General Practitioners. Information is passed and mutual assistance is given to the general benefit of the children of the area.
